
UTM Backup Manager 1.5.0 - Class Diagram (1/2: Application, Web, Services, Providers)
Provider Abstraction
UtmProviderConfiguration
UtmProperties
UtmVmProvider
discovery + status via utmctl
implements
QemuRuntimeStatus
ProcessHandle + path matching
symlink-aware
QemuProcess
QemuProviderConfiguration
QemuProperties
QemuVmProvider
directory discovery
implements
VmProvider <<interface>>
providerId / displayName
configuration / findAll
findStatuses / stop
0..*
VmProviderRegistry
enabledProviders()
Application / Configuration
UtmBackupManagerApplication
@SpringBootApplication
BackupJobConfiguration
WebConfig
BackupProperties
VmProperties
EnabledVmProviders
vm.providers -> vm.provider -> utm
ApplicationConfigurationView
Controller
BackupController
GET / + settings/stable/note/delete
RetentionCleanupJobController
cleanup status
